

Instructions to run the file:

- 1). First Download the zip folder
- 2). I have included the dependencies, if you want to re-install dependencies, delete dependencies folder and install dependencies using “npm install” to get all node modules

Needed node modules :

```
"body-parser": "^1.20.0",  
"ejs": "^3.1.6",  
"express": "^4.17.3",  
"nodemon": "^2.0.15",  
"requests": "^0.3.0",  
"sqlite3": "^5.0.2"
```

- 3). Open the terminal and run the file using “nodemon app.js”
- 4). Open any browser and run the file “localhost:4000”
- 5). Total Course Pages are 4
- 6). My home page will appear with a navbar

7). Home Page Contains my Roll number and my project details along with my team details (as mentioned in the assignment given)
